SUBJECT: Facility Classification Change - Midwest Oil Refining Company, St. Louis, Missouri (MOD000690803).

FROM: Michael J. Sanderson *MJS*  
Acting Chief, AWCN

TO: Robert L. Morby  
Chief, WMBR

On July 20, 1981 the Midwest Oil Refining Company, 1900 Walton Road, St. Louis, Missouri was inspected by the Missouri Department of Natural Resources (MDNR) personnel to determine compliance with Subtitle C of the Resource Conservation and Recovery Act (RCRA).

This facility had previously notified the Environmental Protection Agency (EPA) that they were a generator, transporter and TSDF of hazardous waste.

As a result of this inspection it was determined that this facility does not generate or otherwise handle hazardous waste and should be reclassified as a non-handler of hazardous waste. Please make this change in the data system and notify the facility of this change.

The facility has asked that the inspection report remain confidential and we are treating it as such. If you wish to see the report or have any questions concerning this determination please call David Doyle at x6248.
